Placements & Internships

SEAtS Software the student success platform allows universities, schools & colleges to monitor all student activity while taking part in placements & internships off campus.

Work placements and internships give students the opportunity to develop relevant skills, knowledge and experience while getting first-hand experience of life in a real working environment.

This is an approach that has been adopted by universities, colleges and institutions allowing students this opportunity over a selected period of time during their studies.

Key Benefits

What we do

SEAtS offer the tools to track and record placement detail, meetings, documentation, correspondence, stakeholder compliance, time-sheets and activity in one place.

SEAtS Placement and Internships Module offers universities, colleges and institutions one place to manage the allocation and administration of student placements. Work placements are a big part of the modern student experience and their success has a significant compliance element, particularly for healthcare, educational and social care faculties. There is also a mandatory element to many courses that can be satisfied by the deep integration with SEAtS attendance monitoring software.

Data capture solutions

SEAtS data capture solutions address every student touch point :

- Online forms linked to the student record to capture all placement related activity, interviews, escalations, absences and more.

- Ease of reporting both within and across school courses.

- Early warning alerts based on key indicators.

- Class register via laptop, tablet or smartphone.

- Email of trust based time-sheets with approval workflows to meet stakeholder and funding compliance reporting obligations.

What does this mean for your campus

It is becoming more frequent that universities offer courses that contain some element of placement or internships as part of their program. All this creates a lot of administration, compliance and stakeholder reporting overhead. The SEAtS Software Platform unifies these processes and offers that essential holistic perspective that will drive compliance good practice.

About SEAtS Software

SEAtS sets a new benchmark for student success with advanced early warning systems, work flows, dashboards, reports and analytics.

What SEAtS can deliver for your institution:

- Retain students through critical early informed interventions.

- Increase completion through better analytical insights into progression.

- Enhance reputation through improved student satisfaction and outcomes.

- Enhance resource and space utilisation with instant analytics.

How it Works

SEAtS works by sitting above and drawing information from whatever student record, timetabling and other systems you have in place. We do not look to change what you have simply to add value.

SEAtS Software provides:

- Early Warning Systems.

- Cloud Based.

- Real Time Data.

- Increased Completion.

- Enhanced Reputation.
