- Google Apps & SAML Integration
- Data Warehouse Design
- Microsoft Active Directory
- Document Management
- Business Intelligence
- Big Data Analytics
- Mifare Card Technologies
- Biometrics
- Mobile Technologies
- .NET Development

### SEAtS Data Integration

SEAtS applications are built upon the SEAtS Data Repository. The SEAtS Repository is designed to bring all the benefits of big data analytics to the HE and FE sectors. SEAtS deliver the integration services and connectors that will extract, cleanse and categorise data from every student system and touchpoint across your campus.

### Master Reference Data

SEAtS extracts and collates its reference data from your existing campus systems. Student and course information from your student information systems. Schedule information from your timetabling system and any spreadsheets or placement data that might exist. Online catalogs from your VLE etc.

Value is locked up in every element of data collected across the campus at physical and digital touch-points. The SEAtS consulting team have the expertise to help you collate, integrate, validate, understand and place appropriate value on each element of this data that will help your institution map and re-orient many more successful student journeys into the future.

## About SEAtS Software

SEAtS sets a new benchmark for student success with advanced early warning systems, work flows, dashboards, reports and analytics.

What SEAtS can deliver for your institution:

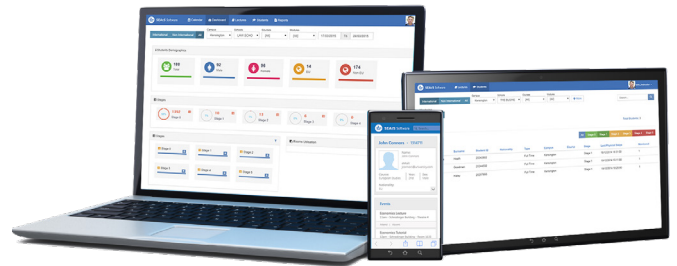

- Retain students through critical early informed interventions.
- Increase completion through better analytical insights into progression.
- Enhance reputation through improved student satisfaction and outcomes.
- Enhance resource and space utilisation with instant analytics.

## How it Works

SEAtS works by sitting above and drawing information from whatever student record, timetabling and other systems you have in place. We do not look to change what you have simply to add value.

SEAtS Software provides:

- Early Warning Systems.
- Cloud Based.
- Real Time Data.
- Increased Completion.
- Enhanced Reputation.
