PRESS RELEASE

Unitec Institute of Technology, Auckland, New Zealand goes live with SEAtS Software of Bray, Ireland for a complete Student Success Solution.

July 2018, SEAtS Software, a leading provider of student success software and analytics for Higher Education, today announced that Unitec Institute of Technology is deploying their software. SEAtS will help Unitec deliver the best possible student experience and outcomes. SEAtS will support Unitec's Student Retention, Engagement, and Compliance Programs.

The solution will include attendance tracking for Unitec's large student body. Students will check into class using the SEAtS mobile application which allows them to record their own attendance on the free SEAtS Mobile App. The Mobile App works with Bluetooth iBeacons which will be located in each of the teaching spaces. Card readers will be used in select locations based on best practices recommended by SEAtS.

SEAtS Early Alert workflows use email and text to communicate with students, faculty and support staff. Critical early alerts will address issues at the earliest possible time. SEAtS data-science powered Learning Analytics identifies students who are trending toward at-risk status. Dashboards and reports empower academic leadership to assess and improve programs and courses.

Unitec Interim Chief Executive Merran Davis said the introduction of SEAtS would allow greater engagement with students.

"Increasing the richness of student data helps us identify where someone might be struggling and get the right support in place early. SEAtS provide a range of functionality which goes well beyond capturing attendance. We believe it will be a useful tool to support our teachers and drive student success.

Merran Davis, Interim Chief Executive

The SEAtS platform will connect with existing campus systems at Unitec, including Student Records, Timetabling and Virtual Learning Environments. SEAtS empowers their customers by leveraging a shared platform that manages student retention, engagement, progression and completion. Our platform reduces paperwork, fast tracks interventions and enhances student outcomes and experience.

"Two months after contract signing with SEAtS Software, Unitec Institute of Technology, Auckland, New Zealand, successfully went live with the SEAtS Attendance Tracking solution for 16,000 students and is proceeding to implement the Early Alert and Learning Analytics components of the SEAtS solution. SEAtS and Unitec collaborated successfully to be ready for their July 23rd academic term and share a high level of excitement for the value that Unitec will derive from the full solution.
