Your Data + Our Software = Student Success

SEAtS Student Equation...

Your Data + Our Software = Student Success

Three good reasons why your institution should consider the SEAtS Student Success Platform:

- Easy to run – Just add data from your campus systems

- Easy to buy – Buy straight from the UK Governments Digital Marketplace

- Easy to use – Ready to go reports, alerts and forms

SEAtS works by sitting above and drawing information from whatever student record, timetabling and other systems you have in place. We do not look to change what you already have simply to add value.

What SEAtS can do for you?

Student Engagement:

To retain students, it is vital to have a clear understanding of how they are engaging with their course and the university itself, that is where we come in. You add the data, run it through our software and out comes the results. It's that simple really.

Academic Engagement, Retention, Attendance and Compliance Management, Reports, Alerts and Analytics

We do not look to change what you already have, simply to add value. We can have you up and running in 90 days and once implemented it can substantially reduce your administrative time and overhead. Delivered on the cloud, all it needs is your data, your student names, your timetable and a stream of verifiable data. We can help you provide it if you don't already have it to hand.

Visa & Immigration Compliance Delivered

SEAtS also deliver reports and processes for Home Office Visa & Immigration Compliance, where any loss, temporary or otherwise of your licence to sponsor and teach international students would undoubtedly have a serious impact on your reputation not to mention the financial implications.
